## DYNAMIC FIELD THEORY SUMMER SCHOOL

The University of Iowa, Iowa City IA  
June 7-11, 2010

### Lecturers

**Dr. John P. Spencer**  
Professor  
University of Iowa  
Director, Delta Center

**Prof. Dr. Gregor Schöner**  
Professor  
Chair for Theoretical Biology  
Institute for Neurocomputing  
Ruhr-University, Bochum, Germany

Dynamical Systems Theory has had a major impact on how researchers think about sensori-motor behavior. Dynamic Field Theory (DFT) has provided a critical bridge from motor control and development into cognitive function. One obstacle for researchers wishing to use DFT has been the mathematical and technical skills required to make these ideas operational. The DFT Summer School will provide the tools needed to overcome this hurdle.

To apply, send a CV and cover letter to  
**john-spencer@uiowa.edu**

There is a \$300 registration fee. See our website for details.  
We anticipate having several fellowships for students.

Co-sponsors: The Delta Center; Institute for Neurocomputing, Ruhr-University, Bochum; Obermann Center for Advanced Studies; and the Laura Spelman-Rockefeller Fund. If you are a person with a disability who requires an accommodation in order to participate in this program, please contact the Delta Center in advance at 319.335.2482.
