

UNIVERSITY OF DELAWARE
Dr. Roberta M. Golinkoff
POST-DOCTORAL FELLOWSHIP, Area: Cognitive Development

Applications for a position are being accepted for a post-doctoral fellowship on an NIH-funded American Recovery and Reinvestment Act project focusing on preschoolers' knowledge of fundamental geometric forms and its relationship to mathematical knowledge upon school entry. The position requires someone with strong research training, statistical expertise, and a Ph.D. in developmental psychology or a closely related area. Ideally, the applicant would be an expert in the area of early mathematical or spatial development and have an interest in young children's thinking. Experience in using an eye-tracker would be welcomed. Funding is available for one year with full benefits.

Responsibilities: Data analysis, writing up results for presentation and publication, literature reviews, designing new studies, some data collection, and collaborative participation with our research team.

Materials: Please submit a CV, cover letter with statement of research interests, letters of recommendation, and evidence of scholarly publications to: Roberta M. Golinkoff, University of Delaware, School of Education, Willard Hall, Newark, DE 19716. If you are interested in the position, please immediately email your CV to Aimee Stahl at UDInfantLab@gmail.com.
